

Why Choose Network Imaging Systems?

What We Do

Network Imaging Systems (NIS) provides CT and MRI system sales and service.

Our Story

In 2002 we began building our reputation for offering expert CT and MRI service and equipment at a fair price. Since then our skilled Field Service Engineers have worked to insure a positive ownership experience with expert and professional service. These same engineers have worked to perfect NIS' refurbishment process for returning CT and MRI systems to factory condition.

Network Imaging Systems

Our Mission

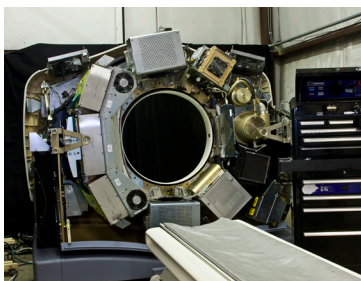

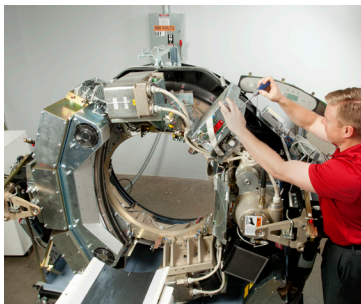

To deliver our customers quality and ownership experience equal to the OEM while saving them money.

Our Vision

To make NIS the region's go-to provider for expert CT and MRI service, equipment, parts, training and support.

Our Values

- Operate a technically superb and efficient company
- Provide all services to customers with the professionalism they deserve
- Communicate schedules and timelines with customers and provide flawless execution
- Instill company values in every employee
- To be forever mindful of the economic impact of system downtime
